FTAO MPSC & Relevant NHS bodies:

Carbon Reduction Plan

Dr Reddy's (UK) Limited together with its parent company Dr. Reddy's Laboratories Ltd, is committed to reduce carbon emissions on an ongoing basis and move towards achieving Net Zero Emissions.

Carbon Net Zero for

Scope 1: Direct Emissions from sources owned/controlled by Dr Reddy's

Scope 2: Indirect emissions from electricity, heat or steam we purchase or use &

Scope 3: less supply chain (not under our direct control, but as a result of our business)

Baseline Year	2021	
Emissions	Reporting Year	Emissions (tCO ₂ e)
Scope 1	2021	349,974
Scope 2	2021	177,457
Scope 3	2021	920,609
Total Emissions		1,448,040
Current Emissions Reporting	Reporting Year	Emissions (tCO ₂ e)
Scope 1	2025	142,772
Scope 2	2025	94,690
Scope 3	2025	845,849
Total Emissions		1,083,311

❖ Verified by DNV VeriSustain

Emissions reduction target

19% reduction seen in our carbon emissions footprint over a period of past 3 years (for overall Dr. Reddy's group) reflects our commitment and is a result of several on ground actions taken by us.

Near Term Target

We expect that carbon emissions will decrease over the next five years so that we are Carbon Neutral by 2030 for direct emissions (Scope1 and Scope 2). We intend to have a 12.5% reduction in our indirect emissions (Scope 3) by 2030.

Long Term target

Our long term ambition is to achieve net zero emissions and we are actively considering stating it as our public commitment after conducting due diligence on its feasibility and timelines assessment. .

Carbon Reduction Projects

Our de-carbonisation strategy focusses on energy mix, conservation, performance, transition, and eventually carbon sequestration with meaningful investments in afforestation and sustainable agriculture. This includes reducing our energy consumption with energy-efficient technologies and processes, adopting low or no carbon fuels, substituting fossil fuels in boilers with alternate biomass fuel sources such as rice husk and sawdust briquettes, purchasing energy from renewable sources, and realigning our business operations to lower emissions

Completed Reduction Projects

- 783 mn KL water saved through agri-water saving techniques
- 66,723 MTCO₂ e of direct emissions reduction
- 11% reduction in water intensity per rupee of turnover with respect to FY2024
- 60% carbon neutrality achieved
- 68% renewable power share
- 75,761 KL harvested rainwater used
- 54% water reused/recycled

Declaration and Sign Off

This carbon reduction plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) standard.

The Carbon Reduction Plan has been reviewed and signed off by the management body.
